

iMouse™ E2

Vertical Ergonomic Illuminated Mouse

www.adesso.com

The Adesso Vertical Ergonomic Illuminated iMouse E2 is specially designed to provide the utmost comfort at the touch of your palm.

The special ergonomic vertical design, with a soft rubber grip, offers a unique and comfortable user experience. Three convenient buttons on the side allow intuitive control for faster back and forward browsing navigation. In addition, there are four levels of DPI (400/800/1600/3200) available.

The laser sensor technology allows precision in pointing while letting you work on most surfaces, such as glass, wood, marble, or leather. This eliminates the need for a mouse pad and gives you more control.

■ Ergonomic Vertical Design

The vertical design provides better support for your forearm, minimizing wrist pain that can come from twisting. Our vertical ergonomic model helps you achieve a more natural grip, better support, and natural wrist position. With our sleek design and added support, the Adesso Vertical Ergonomic Illuminated iMouse E2 is perfect for long hours of use.

■ Adjustable DPI Switch and Back/Forward Buttons

Attain higher precision and better accuracy with your choice of DPI levels. Easily switch from four different DIP levels from 400/800/1600/3200 and navigate through your web browser using the back and fourth buttons within your fingertips.

■ Advanced Laser Sensor

Advanced laser sensor allows greater precision in mouse navigation, increases battery life, and works on any surface -- even glass -- eliminating the need for a mouse pad.
